CIA Has Shady Finger In News Events

To The Dallas News:

The CIA is constantly being exposed as having a shady finger in important news events such as U.S. pilot Powers being downed in Russia, President Diem and his brother's assassinations in South Vietnam, NSA students' association being furnished heavy funds for years and the spurious CIA foundations receiving millions of taxpayers' dollars for the support of leftist projects.

Now the Washington Observer Newsletter is willing to furnish a grand jury with documentary evidence that three CIA personnel were destroyed bodily when they uncovered the existence of a Soviet spy ring inside the CIA. The accused leader of the Soviet spy ring was immediately transferred to the "seventh floor" Bureau of Intelligence and Research in the U.S. State Department. In this position of policy-making, affecting the security of the nation, he is safe from normal investigation. How long will Congress and the people allow this shameful farce to go on?

ROBERT C. SCHWAB.
